

## ABSTRACT OF THE DISCLOSURE

A user confirmation system using a recording medium capable of storing information includes a biological information obtaining part for obtaining first biological information on a user at a time of first use of a recording medium, an owner registration part for registering the first biological information in the recording medium, considering the user as an owner of the recording medium, and an owner confirmation part for detecting second biological information on a user at a time of second and later use of the recording medium, and determining whether or not the user using the recording medium is identical with the owner registered in the recording medium, based on the first and second biological information.
